1. Installation

Download Extension

- Download the extension on the website:
<https://www.tigren.com/product/magento-2-multiple-order-emails/>

Unpack Zip File

- After downloading, unpack the extension zip file

Upload Files

- Upload all the files from the extension package to the root folder of your Magento installation

Run Following Commands

- `php bin/magento module:enable Tigren_Core`
- `php bin/magento module:enable Tigren_Multipleorderemail`
- `php bin/magento setup:upgrade`
- `php bin/magento cache:flush`

2. Module Configuration

Admin Panel => STORES => Configuration => TIGREN => Multiple Order Emails
Or: Admin Panel => MULTIPLE ORDER EMAILS => Settings

The screenshot shows the Tigren Admin Panel's Configuration page. On the left is a dark sidebar with icons for Dashboard, Sales, Products, Customers, Marketing, Content, Multiple Order Email, Reports, Stores, System, and Find Partners & Extensions. The main content area is titled 'Configuration' and includes a search bar, a bell icon, and a user profile 'admin'. Below this is a 'Store View' dropdown set to 'Default Config' and a 'Save Config' button. A left-hand menu lists categories: GENERAL, CATALOG, CUSTOMERS, SALES, TIGREN (expanded), Tigren Store, Multiple Order Email (selected), SERVICES, and ADVANCED. The 'General Settings' section for 'Multiple Order Email' contains two fields: 'Enable to send email Notification to Admin when having new Order/Invoice/Shipment [store view]' with a dropdown menu currently showing 'Yes', and 'Default Admin Email Address Received Notification [store view]' with an empty text input field. Two green callout boxes provide instructions: one points to the dropdown menu saying 'Choose "Yes" if your want to receive notification of new order', and the other points to the email address input field saying 'Set the email address receiving notification. E.g.: mail9610@gmail.com'.

4. Set Conditions For New Email Template

Admin Panel => Multiple Order Email => Multiple Order Email => Add New template

The screenshot shows the 'Custom Email' admin interface. On the left is a sidebar with navigation links: DASHBOARD, SALES, PRODUCTS, CUSTOMERS, MARKETING, CONTENT, and MULTIPLE ORDER EMAIL. The main content area has a header 'Custom Email' with search, notification, and user icons. Below the header is a large light gray box with a green arrow pointing to an orange 'Add New Template' button. A table below shows '0 records found' with columns: ID, Title, Description, Payment Method Ids, Shipping Method Ids, Status, and Action. The table body contains the message 'We couldn't find any records.'

Custom Email

0 records found

20 per page

1 of 1

ID	Title	Description	Payment Method Ids	Shipping Method Ids	Status	Action
We couldn't find any records.						

What you have to do here is to create a new email template based on the template we've just created plus conditions for using that template.

4. Set Conditions For New Email Template

Step 1: Add General Information

System Messages: 1

New Multiple Order Email

← Back Reset Save and Continue Edit **Save Order Email Template**

ORDER EMAIL TEMPLATE INFORMATION

- General** 1
- Conditions
- Email Template

Information

Order Email Name *

Description

Status * Enable

Priority Set priority for this email (E.g.: 0,1,2,...)

Set email name and write a short description for this email (optional)

The Priority will work when an order meets the conditions of different emails at the same time. In that case, the email that have higher priority (smaller priority number) will be used only.

4. Set Conditions For New Email Template

Step 2: Set Conditions for using this email
