The left sidebar contains a menu with the following items: DASHBOARD, SALES, CATALOG, CUSTOMERS, MARKETING, CONTENT, REPORTS, STORES, SYSTEM, and FIND PARTNERS & EXTENSIONS. The 'TIGREN' item is expanded, and 'Custom Address' is highlighted with a red box. The main content area is titled 'Configuration' and shows 'Store View: Default Config'. A 'Save Config' button is visible in the top right. The 'General Settings' section is active, showing 'Suggestion Type' set to 'Autocomplete' and 'Move Billing Address' set to 'Yes'. 3. MODULE CONFIGURATION

Choose a **Suggestion type**:

- **Autocomplete**: the users can enter a random field among *Subdistrict*, *City*, *State/ Province* and *Zip/ Postal Code* and the remaining will be auto-filled very quickly.
- **Drop-down**: the buyers have to select the suggestions in order: *State/ Province* => *City* => *Subdistrict* => *Zip/ Postal code*. Let's say, firstly they select the **State/ Province** as "Bangkok". After that, the list of suggested cities in **City** will be *narrowed down* to the ones belong to "Bangkok" only. Similarly, once the users choose the city, it will show the **Subdistrict** correspondingly. Finally, after opting for the subdistrict, the **Zip/ Postal code** will be auto-filled without drop-down suggestions.
